

# Science

## Human Body

## Our 5 senses

1. Help keep up safe.
2. Help us to learn.
3. Let us experience the world around us.

Your senses work together to let your brain know what is going on around you.

How do they help keep us safe?

## Nose to smell.

## Tongue to taste.

## Eyes to see.

## Hands to touch and feel.

## Ears to hear sounds.

How are we the **same** and how are we **different** to people around us?

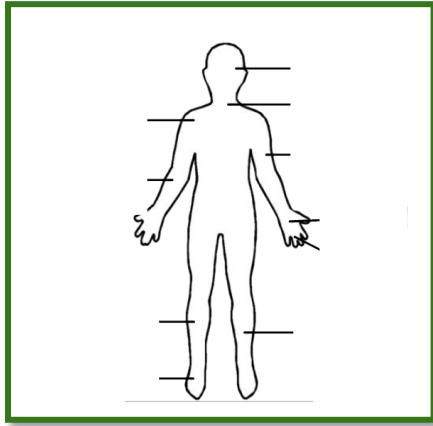

## Our skeleton helps us to:

1. Stand up.
2. Move around.
3. Protect the organs inside our bodies.

## Assessment

1. How many parts of the human body do you know?

2. Look at a partner. How are you different and how are you the same?

3. Can you name the five senses?

4. We have a right to stay safe!

Choose one of the senses. Can you explain how it keeps us safe?
