

Animals

Pets

Domestic animals make good pets.
Wild animals can not be kept as pets.

Pets need things to help them live and grow:

- Food
- Shelter
- Healthcare
- Exercise

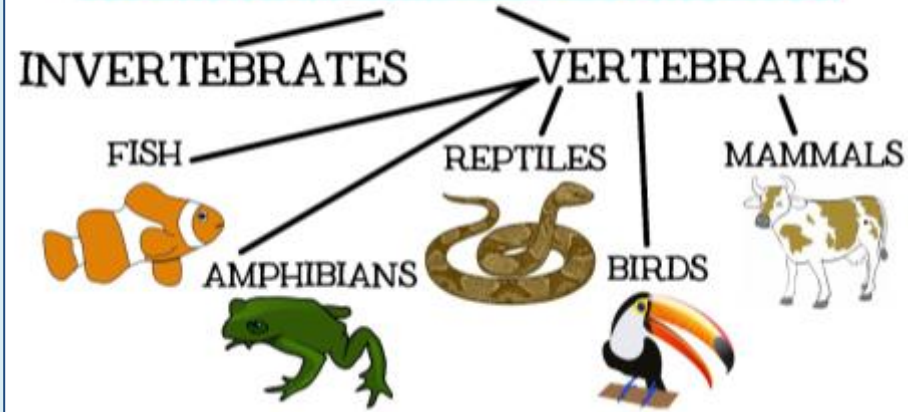

MR FAB

Mammals
Reptiles

Fish
Amphibians
Birds

ANIMAL CLASSIFICATION

Reptiles...

- ...have **dry, rough, scaly skin**.
- ...have **lungs for breathing air**.
- ...hatch from **eggs**.

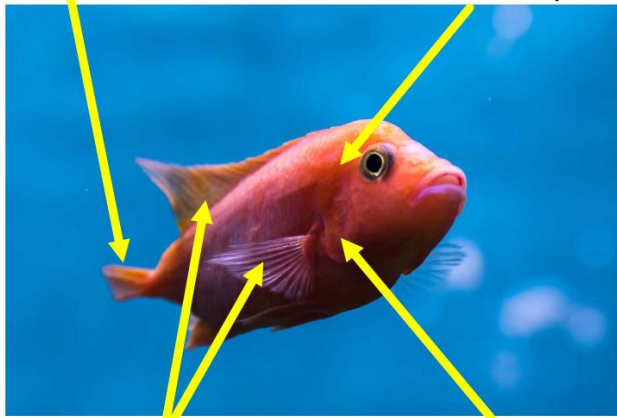

Amphibians...

- ...live **in water** and **on land**.
- ...have **smooth, moist skin**.
- ...lay their **eggs in water**.

Tail Fish

Scales that overlap

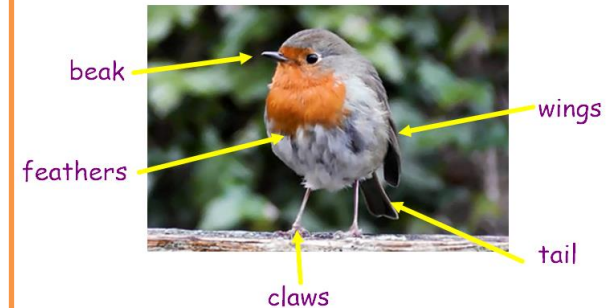

Fins to swim

Gills to breathe water

A dolphin is not a fish!
It doesn't have gills or scales. A dolphin is a **mammal**. It breathes air, not water.

Birds

Assessment

1. Vertebrates are split into five groups.
Name them! (MR FAB)

2. Can you describe how to care for a pet?

3. Explain the difference between fish and birds.

4. Rahim says that dolphins are a type of fish.
Is he correct? Why/why not?
